DETAILED ACTION

Claims 1-14 and 16-22 are pending in the application.

Election/Restrictions

Applicant's election without traverse of Group III in the reply filed on March 20, 2008 was acknowledged in the previous Office Action. The requirement was deemed proper and therefore made FINAL in the previous Office Action.

Subject matter not embraced by elected Group III and Claims 1-13 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on March 20, 2008.

Rejections made in the previous Office Action that do not appear below have been overcome by Applicant's amendments to the claims. Therefore, arguments pertaining to these rejections will not be addressed.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 16 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 16, the R^1 variable, the X variable, the A variable substituent, the R^2 variable and the R^3 variable are not adequately defined so that the metes and bounds of the claim can be ascertained. Therefore, claim 16 is indefinite.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14 and 16-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Momose et al. {U.S. Pat. 6,251,926}.

Determination of the scope and content of the prior art (MPEP §2141.01)

Applicant claims a method of inhibiting a body weight gain in a mammal comprising administering a compound of formula (I). Momose et al. (see entire document) teach a method for treating obesity (column 22, lines 39-43 and 61-63) by administering combinations of agents/drugs (column 23, lines 6-26) for treating a disease such as obesity comprising an

insulin sensitivity enhancing agent (i.e., pioglitazone hydrochloride - column 23, lines 31-33), and any other two kinds of agents (column 24, lines 54-67 and column 25, lines 1-2) such as an angiotension II antagonist {i.e., Candesartan (a compound of instant formula (I) - column 23, lines 63-65} and an antiobesity agent (i.e., dexfenfluramine - column 23, line 67).

***Ascertainment of the difference between the prior art and the claims
(MPEP §2141.02)***

The difference between the method of the prior art and the method instantly claimed is that the drugs/agents utilized in the instant claimed method of use are generically taught in the prior art.

***Finding of prima facie obviousness--rational and motivation (MPEP
§2142-2413)***

The indiscriminate selection of "some" among "many" is *prima facie* obvious, In re Lemin, 141 USPQ 814 (C.C.P.A. 1964). The motivation to make the combination of drugs/agents derives from the

expectation that the combinations of drugs/agents would be beneficial in treating a disease (e.g., treating obesity).

One skilled in the art would thus be motivated to prepare combinations of drugs/agents embraced by the prior art to arrive at the instant claimed method of use with the expectation of obtaining additional beneficial products which would be useful in treating obesity. The instant claimed invention would have been suggested to one skilled in the art and therefore, the instant claimed invention would have been obvious to one skilled in the art.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL.** See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

This application contains subject matter not embraced by elected Group III and Claims 1-13 drawn to

an invention nonelected without traverse in the reply filed on March 20, 2008. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.
